

Grow My Search Manual

11/8/2021

<https://www.growmysearch.com>

After logging in, You will be able to do the following:

- Enter Keywords that you want to start the crawl.
- Enter URL starting from http:// or https:// to start the crawl.

The screenshot shows the website's interface. At the top, there is a browser address bar with the URL <https://www.growmysearch.com/welcome.php>. Below the address bar is a large illustration of a person in a business suit holding a magnifying glass over a computer screen. Underneath the illustration is a text input field labeled "Highlight:". Below this is a search bar with the word "Search" on the left and a magnifying glass icon on the right. Under the search bar is a grey box with the text "Type Words to Expand here:". Below that is a large empty text input field. To the right of this field is a large blue arrow pointing left with the text "Enter Keywords to Start Crawler Here". Below the input field is a "Save Word seeds" button. Underneath the button are three radio button options: "Usearch", "Searx (日本語対応 おすすめバージョン)", and "Yacy (日本語対応)". Below these options is the text "Select English or 日本語 for seeds from Searx". At the bottom of this section are two buttons: "English" and "日本語".

The image shows a web interface for a crawler. At the top, there is a header "Type URL to Start here:" followed by a text input field containing "http:// or https://". Below this is a blue button labeled "Save URL seeds". The second section is titled "Launch / Stop Crawler, Insert to Database" and contains a large empty text area labeled "Output:". Below the output area are three blue buttons: "Launch Spider", "Stop Crawler", and "Insert to Database". A large blue arrow points from the right side of the image towards the URL input field, with the text "Enter URL here" written inside the arrow.

Before doing so, please select the search engine you want to grab the seed URLs from

- Usearch (Israeli based search engine)
- Searx
(Privacy focused meta-search engine that combines Google, Bing, YouTube etc.)
(There are English and Japanese versions of Searx)
- Yacy (community search engine)

After entering the keywords below “Type Words to Expand here:”,

- Click on “Save Word seeds” to save the setting.

This will notify Grow My Search which search engine to get the seed URLs from.

After this step, click on “Launch Spider” to start the crawl with the web crawler.

You will also be able to type in the URL (Starting with http:// or https://) and start the crawler from there.

After this step, click on “Launch Spider” to start the crawl with the web crawler.

After stopping the crawler, you will be able to do the following:

- Insert to the Database

After the insertion to the database has been completed, you will be able to search your own search database. (The Textbox with “Search” inside the textbox is the one you must use.)

Click on the magnifying glass after entering the query to start the search inside your search database.
